Specs and Info

Vehicle Summary

1985 M5 ordered and imported by 24 time PGA champ Johnny Miller. Seemingly through extensive research, the highest optioned euro M5 in the country. With full buffalo hide interior, rear sunshade, rear headrests, sunroof, on board computer, air conditioning, brown tinted glass, fire extinguisher, and, sls delete.

Currently with a low 94,000 miles the car went through a concours level restoration last year (2004) and has placed first in 5 concours events since. It is also driven weekly and is under her own power when traveling to such events (no trailer queen here). Most pictures will not serve the car any justice as it is much better served in person.
